

OpenFlex Updates 1.71 june 2024

Discover the new features available on the OpenFlex platform

Update 1.71 - June 2024

Presentation developments

Vehicles

1. Optimising information display
2. Simplifying NV/DV/UV price management interface
3. New: creation of the customer mode
4. Harmonising and simplifying functioning of filters
5. New: adding video links on vehicle sheets
6. New display of customised features in filters
7. Highlighting the UV adjusted market value
8. Redirecting to the database matching lock area

Opportunities

1. Sending automatically vehicles without a market value intended for bidders
2. Sales to professionals: entry of administrative costs (optional)
3. New display of trade-in prices

Customers

1. PriceBack: connecting merchants with all the entities in a group

Vehicles

1 Optimising information display:

Information display in the vehicles module has been improved to make it easier to manage and monitor vehicles in stock.

Signage in the form of a coloured vertical bar has been integrated to differentiate vehicles belonging to your entity from others.

The vehicle type format display has been changed as follows:

Before this update, the column which described the vehicle type included the following wordings:

For UV : "Used individual / Used professional"

For DV : "Demonstration"

For NV: "New"

From now on, the vehicle type display will be the following:

For UV : "UC Individual / UC Professionnal"

For DV : "DC"

For NV : "NC"

2 Simplifying NV/DV/UV price management interface:

Before this update, it was necessary to make several operations in order to access the menus which allowed you to manage NV/DV/UV selling prices. You had to click on the "See the detail" button and on "manage prices".

3 New: creation of the customer mode

Now, you can hide "sensitive" commercial information that should not be seen by a customer during a business appointment by switching to "Customer mode".

The screenshot shows the 'KIA SPORTAGE BUSINESS' vehicle page in 'Customer mode'. The interface is clean, with a navigation bar at the top containing 'Home', 'Vehicles', 'Opportunities', 'Customers', and 'Management'. The user is logged in as 'bee2link PP Vincent S.' at 'Point de vente 2 (Vincent S.)'. A blue eye icon in the top right corner is highlighted with a blue arrow, indicating that sensitive information is hidden. A notification box states 'Client mode deactivated. Sensitive sales information is not hidden.' The main content area shows the vehicle details for 'KIA SPORTAGE BUSINESS'. The price is '19 909,55 € Incl. VAT'. The 'Adjusted market value' is '20 060,00 € Incl. VAT', which is highlighted with a blue arrow. The vehicle is described as 'SPORTAGE 1.6 CRDI 136CH MHEV BVM6 4X2 ACTIVE BUSINESS'. The status is 'Used - Individual' with 'GD-645-ML'. The type is 'Vehicule tout-terrain' and the police number is '456'. The vehicle is '1 day in stock'. The interface includes buttons for 'Make offer with this vehicle', 'Schedule a trial appointment', 'Modify', and 'Reserve the vehicle'. There are also tabs for 'SYNTHESIS', 'EQUIPMENT AND OPTIONS', 'ADDITIONAL PRODUCTS', and 'OTHERS'. A 'Manage status' link is visible in the top right corner.

In "normal" mode, usual data used to manage a vehicle in stock is visible.

The screenshot shows the 'KIA SPORTAGE BUSINESS' vehicle page in 'Normal mode'. The interface is more detailed, showing the same navigation bar and user information as the previous screenshot. The blue eye icon in the top right corner is highlighted with a blue arrow, indicating that sensitive information is visible. A notification box states 'Client mode deactivated. Sensitive sales information is not hidden.' The main content area shows the vehicle details for 'KIA SPORTAGE BUSINESS'. The price is '19 909,55 € Incl. VAT'. The 'Adjusted market value' is '20 060,00 € Incl. VAT', which is highlighted with a blue arrow. The vehicle is described as 'SPORTAGE 1.6 CRDI 136CH MHEV BVM6 4X2 ACTIVE BUSINESS'. The status is 'Used - Individual' with 'GD-645-ML'. The type is 'Vehicule tout-terrain' and the police number is '456'. The vehicle is '1 day in stock'. The interface includes buttons for 'Make offer with this vehicle', 'Schedule a trial appointment', 'Modify', and 'Reserve the vehicle'. There are also tabs for 'SYNTHESIS', 'EQUIPMENT AND OPTIONS', 'ADDITIONAL PRODUCTS', and 'OTHERS'. A 'Manage status' link is visible in the top right corner.

In "Customer" mode, the sales representative will be able to show the vehicle file to a prospect to show them pictures or data about the vehicle history at the bottom of the page without making visible information on trade-in prices, margins and market values.

The screenshot displays a web application interface for vehicle management. At the top, there is a navigation bar with links for Home, Vehicles, Opportunities, Customers, and Management. The user is logged in as 'bee2link PP Vincent S.' at 'Point de vente 2 (Vincent S.)'. A blue arrow points to a lock icon in the top right corner, indicating that 'Customer mode' is activated, which hides sensitive sales information. Below the navigation bar, the breadcrumb trail shows 'VEHICLES > KIA SPORTAGE BUSINESS'. A notification box states 'Customer mode activated. Sensitive sales information is hidden.' The main content area is titled 'KIA SPORTAGE BUSINESS' and includes a 'Manage status' link. Action buttons include 'Make offer with this vehicle', 'Schedule a trial appointment', 'Modify', 'Reserve the vehicle', and a menu icon. The 'SYNTHESIS' tab is selected, showing the price '19 909,55 € incl. VAT' and a 'Not reconciliated' status. Vehicle specifications include 'ETHANOL', '7 CV / 136 CH', '5D', and 'SUV'. The vehicle is categorized as 'Used - Individual' with a police number of '456'. A photo of the white SUV is shown, along with links to 'Add media (0 pictures, 0 videos)' and 'Technical characteristics'.

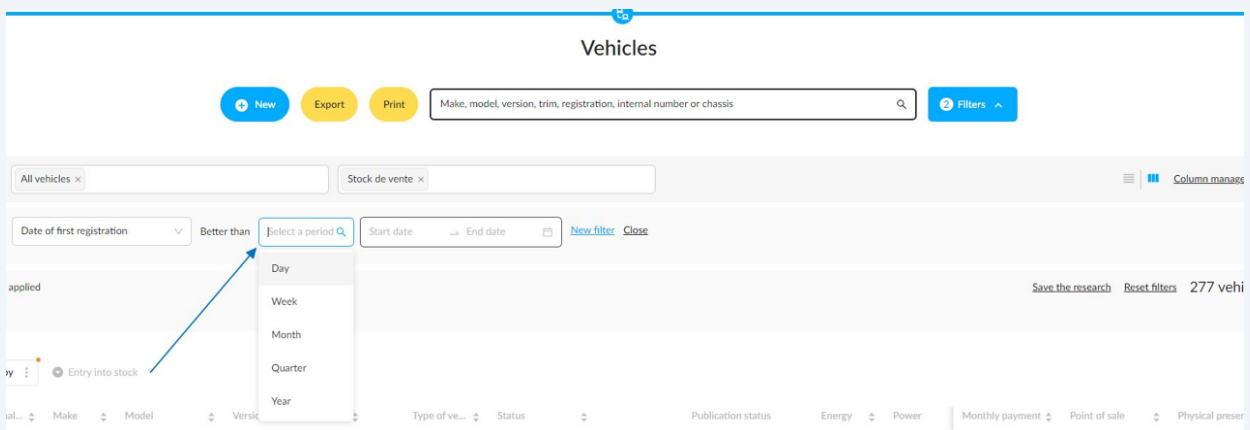

In order to make the use of filters simpler, a new method is available.

It will apply to filters that enable you to search for cars by date. The filters concerned are the following:

- First registration date
- Entry into stock date
- Order date
- Delivery date
- Extreme delivery date
- Forecast entry date
- Exit date

You will be able to order them by period of time:

- Day
- Week
- Month
- Quarter
- Year

Example with the filtering by date of first registration, sorting by month:

The screenshot shows a web interface for 'Vehicles'. At the top, there are buttons for 'New', 'Export', and 'Print', followed by a search bar with the placeholder text 'Make, model, version, trim, registration, internal number or chassis' and a 'Filters' button. Below this, there are two dropdown menus: 'Display' (set to 'All vehicles x') and 'Stock de vente' (set to 'x'). A 'Column management' icon is visible on the right. The main filter section is titled 'Such as' and includes a dropdown for 'Date of first registration', a 'Better than' dropdown set to 'Month', and a date range '01/2024' to '05/2024'. A 'Filters' icon is next to the date range. Below the filter, there are 'Filters applied' and 'Sorted by' sections. The 'Filters applied' section shows 'Date of PIS min' as '01/04/2024' and 'Date of PIS max' as '31/05/2024'. The 'Sorted by' section is set to 'Entry into stock'. A calendar dropdown is open, showing the months of 2024 and 2025. The month of April 2024 is highlighted in blue, and a blue arrow points from the 'Month' dropdown to the calendar.

Example with the filtering by date of first registration, sorting by week:

The screenshot shows the same 'Vehicles' dashboard. The 'Such as' filter section is now set to 'Date of first registration' with a 'Better than' dropdown set to 'Week'. The date range is '01/4-2024' to '02/2-2024'. The 'Filters applied' section shows 'Date of PIS min' as '01/04/2024' and 'Date of PIS max' as '31/05/2024'. The 'Sorted by' section is set to 'Entry into stock'. A calendar dropdown is open, showing a weekly view for April 2024. The calendar has columns for 'Su', 'Mo', 'Tu', 'We', 'Th', 'Fr', and 'Sa'. The dates 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, and 31 are visible. A blue arrow points from the 'Week' dropdown to the calendar.

5 New: adding video links on vehicle sheets

A dedicated space for storing video links has been added to vehicle data sheets in the visuals section.

6 New display of customised features in filters

On a vehicle sheet, you can modify features of a vehicle when it has been "customised" or when the database of reference provides wrong data.

Destination *	<input type="text" value="Individual"/>
Used car origin *	<input type="text" value="Private"/>
Energy	<input type="text" value="Ethanol"/>
<i>(Diesel, data from the referential)</i>	
Power	<input type="text" value="7"/> CV <input type="text" value="136"/> ch
Number of doors	<input type="text" value="5"/>
Body	<input type="text" value="SUV"/>
<i>(Tout-Terrain, data from the referential)</i>	

Before this update, manually modified elements could not be filtered or viewed in the stock management table.

Nor were they visible on sales documents and presentation posters. Nor in publications.

Example of a UV with a manually added energy (*Ethanol*) different from that suggested by the database (*Petrol*).

Destination *
Individual

Used car origin *
Private

Energy
Ethanol
(Diesel, data from the referential)

Power
7 CV 136 ch

Number of doors
5

Body
SUV
(Tout-Terrain, data from the referential)

View of the energy column in the table showing the UV stock: only the energy "Petrol" is displayed.

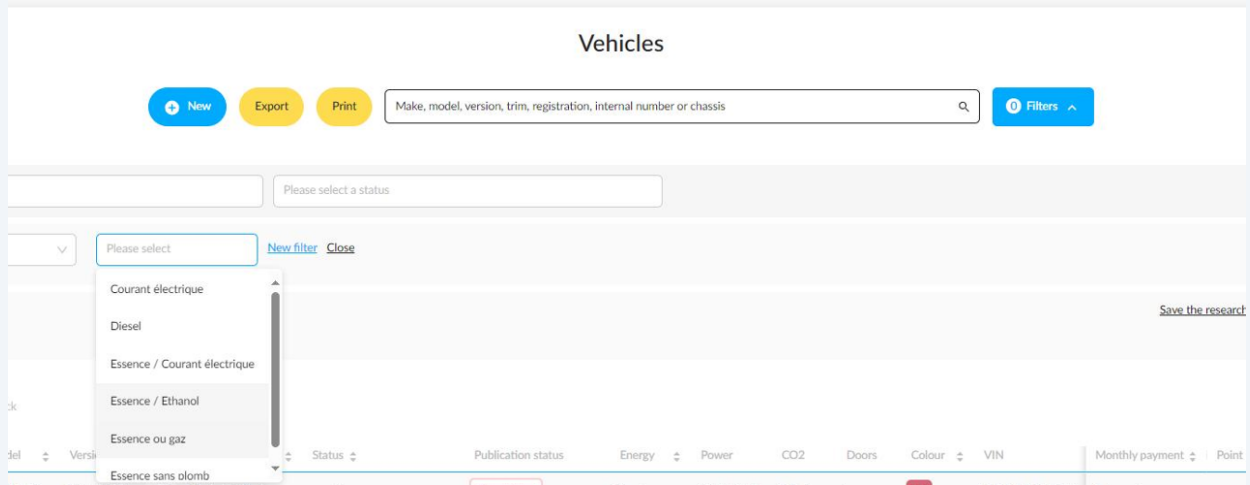

Vehicles

New Export Print

Make, model, version, trim, registration, internal number or chassis

Model	Version	Type of vehicle	Status	Publication status	Energy	Power	CPZ	Doors	Colour	VIN	Monthly payment	Point

	SLK 200 K - A	Used - Individual	cosmetic p...	Not published	Essence sans p...	184 ch / 135 k...	190 g/km	2	Black	WDB1714451F219881	E- / month	Vincen

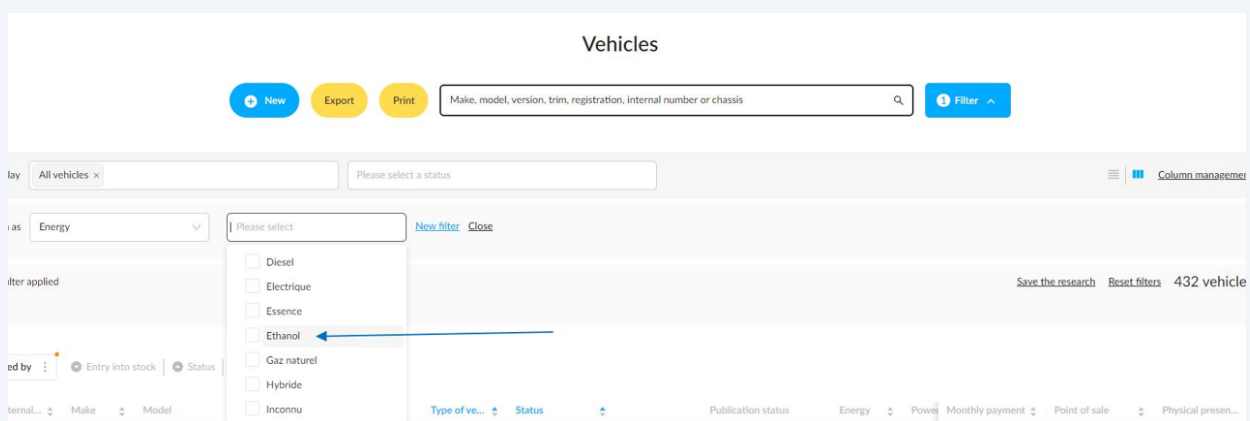

View of the available filters by type of energy: "Ethanol" cannot be selected.

Now, the features customised by users will be taken into account in:

- tables which present the stock of vehicles.
- Filters: by energy, body, gearbox, type, family (*filter only available for motorcycles*).
- Sales documents (*offer, order form, description sheet, trade-in estimate, second opinion...*)
- Presentation posters and publications.

When selecting a filter, you will be able to filter by the customised data that you have added or the data of the database which will match the default features.

Redirecting to the database matching lock area:

In the past, at the end of a database matching, users switched to the file of the vehicle they had just checked. They had to go back to the homepage to access again the lock area where are listed all vehicles to be reconciled.

To make the work of stock managers easier during the process of database reconciliations in the lock area, we have redesigned the way it works to enable users to qualify vehicles successively.

From now on, after a database matching, they will stay in the lock area to continue processing vehicles without being interrupted.

Opportunities

1 Sending automatically vehicles without a market value intended for bidders:

Prerequisite: to have set up automatic trade-in validation for vehicles intended for professionals.

In the past, during a trade-in, when a vehicle without a market value was intended for professionals, a user who had the permission to confirm trade-ins had to intervene to send the vehicle to bidders.

From now on, if the settings are correct, a vehicle without a market value intended for automotive professionals will automatically be sent to bidders without any intervention being necessary.

Summary

Display amounts :

Incl. VAT Excl.

Vehicle purchased (2 vehicles)

Initial total amount:
14.637,66 €

Final total amount:
14.637,66 € [Modify](#)

Actual commercial margin:
12.300,55 €

Administrative expenses :
0,00 € [Modify](#)

Balance to be paid:
14.637,66 €

The amount of the fees invoiced can be added to the offers using 2 different methods:

-1) Entering the amount which covers all administrative costs of the sale in the "Total" field. In this case, the cost of administrative expenses will be dispatched automatically between each vehicle in the offer.

The screenshot shows a dialog box titled "Administrative expenses" with a close button (X) in the top right corner. Below the title is a sub-header "Administrative costs Excl.". The dialog contains a table with two rows of vehicle information and a "Total" row. Each row has a text input field for the amount and a "€ Excl." button. A blue arrow points to the "Total" input field, which contains the value "1000". Below the table are two buttons: "Save" (highlighted with a blue arrow) and "Cancel".

Administrative costs Excl.	
Citroën Berlingo Kasten (06.2008->) L2 Proline DE - Ka4 1.6 BlueHDi 100 FAP EU6, L2 Proline Solution, 2016 - 2018	500 € Excl.
Peugeot 2008 (P1) Allure Pack DE - SUV5 1.2 PureTech 130 EU6d, Allure Pack (EURO 6d), 2020 - 2023	500 € Excl.
Total	1000 € Excl.

-2) Entering manually administrative expenses that you have counted for each vehicle of the offer. The total amount will be calculated automatically.

The screenshot shows the same "Administrative expenses" dialog box. In this version, the input fields for each vehicle contain manually entered values: 216 for the Citroën and 158 for the Peugeot. The "Total" input field now shows the automatically calculated sum of 374. Blue arrows point to each of these input fields. The "Save" and "Cancel" buttons are at the bottom.

Administrative costs Excl.	
Citroën Berlingo Kasten (06.2008->) L2 Proline DE - Ka4 1.6 BlueHDi 100 FAP EU6, L2 Proline Solution, 2016 - 2018	216 € Excl.
Peugeot 2008 (P1) Allure Pack DE - SUV5 1.2 PureTech 130 EU6d, Allure Pack (EURO 6d), 2020 - 2023	158 € Excl.
Total	374 € Excl.

A section which corresponds to administrative costs that you have entered before has been added to offers and order forms for professionals.

Barzahlung bei Bereitstellung sofern nachstehend nichts anderes vereinbart

3 New display of trade-in prices:

Before this update, the prices displayed in the trade-in prices management menu were displayed in fields whose dimensions did not sufficiently highlight the destination of the trade-in vehicle.

Example with a trade-in sent automatically to professionals:

The screenshot shows a car trade-in management interface. On the left, a Cadillac Lyriq is listed with a trade-in estimate of £490,896.02 (incl. VAT). The car is described as an electric SUV with 528 CH / 388 kW, white exterior, and black interior. On the right, a 'Management of the trade-in price' menu allows selecting the vehicle destination. Three options are shown: Individual (-£6,586.65 incl. VAT), Professional (£490,896.02 incl. VAT), and Scrapyard (£1.00 incl. VAT). The 'Professional' option is currently selected.

From now on, the trade-in price corresponding to the chosen destination or allocated automatically will be highlighted in contrast to the other prices displayed.

Example of display with a trade-in intended for individuals:

Impact	Value	Unit
Origin impact	0.00	€ Incl. VAT

Customers

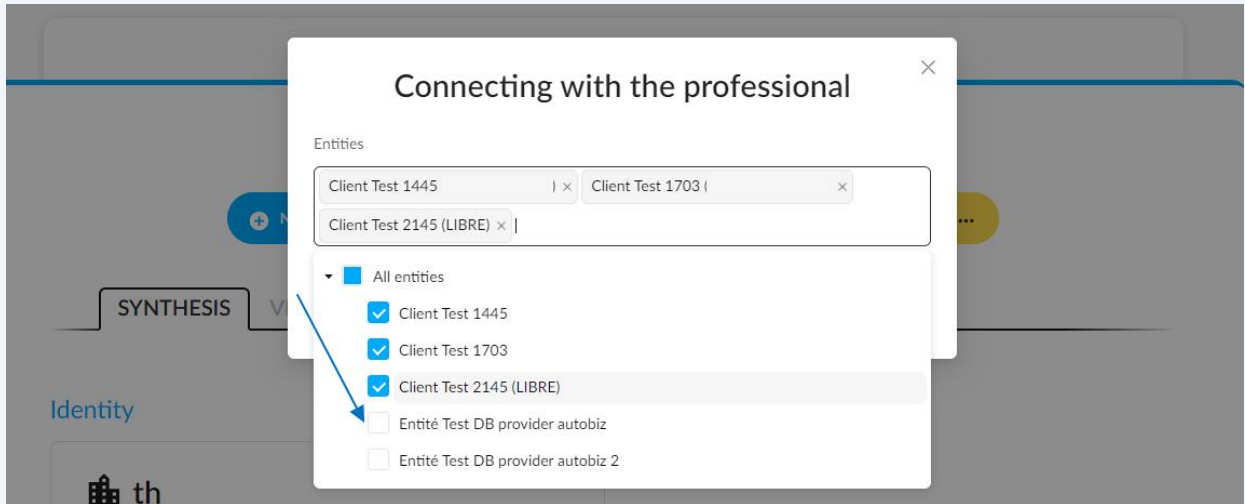

1 PriceBack: connecting merchants with all the entities in a group

Prerequisite: to have configured the sharing of customer files between group entities so that the merchant contacts are visible from each partner entity.

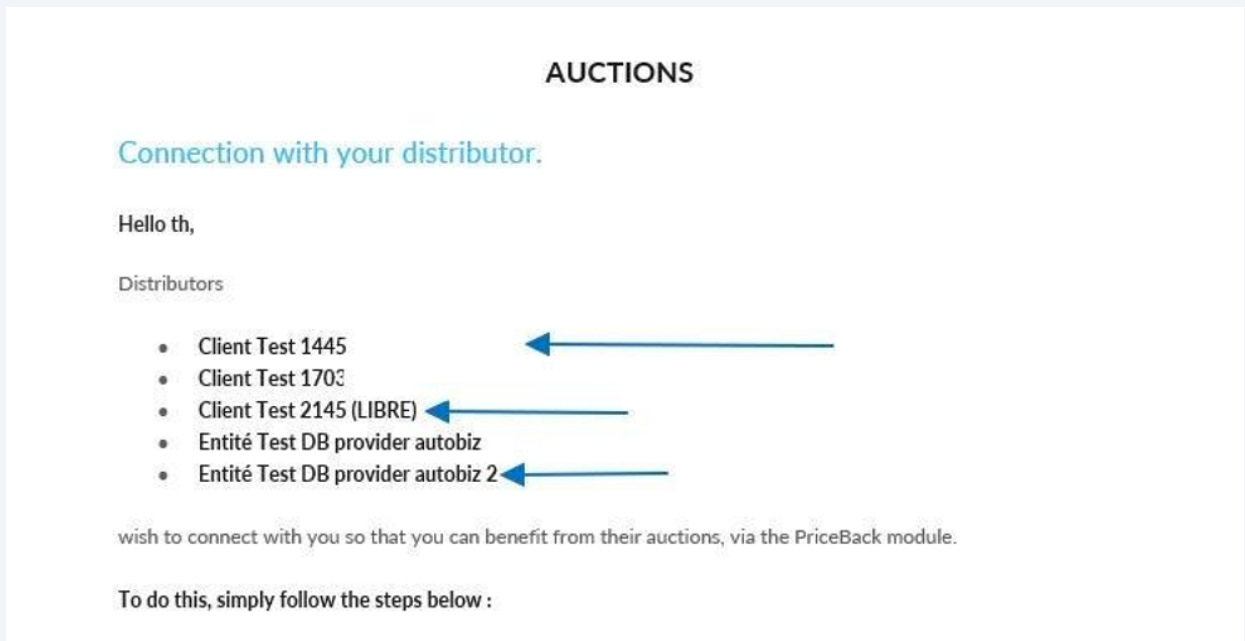

Before this update, it was necessary to connect the merchants who participated in the PriceBack campaigns one entity at a time in a group.

To save you time, you can now establish the connection between a merchant and the various entities in a group in a single action.

The list of distributors who will be partnering with the merchant will be included in the invitation email they receive.
