

Update 1.72 - June 2024

# Presentation developments

---

## Vehicles

1. Provision of market value on the page of reconciliation of vehicles with the database
2. Display of phone numbers
3. Compliance of Spoticar and DS Certified price displays (S&Y DEU)
4. New feature: managing stocks located in several entities

## Settings

1. Addition of an extraction system to record actions carried out with our paid features

# Vehicles

1

## Provision of market value on the page of reconciliation of vehicles with the database:

To assist you when assigning the best prices to the vehicles during their qualification with the database, we have added information on their market value.

The screenshot displays a dashboard with a 'My shortcuts' section at the top left, featuring a card for '703 Couleur' and a '+ New shortcut' button. Below this is a grid of 12 cards, each representing a different vehicle status or process. To the right of the grid is a 'View my diary' link and a 'Later on' section with a message: 'No events scheduled during next weeks.'

Metric	Value	Description
Estimates	38	Awaiting validation
Vehicles	77	Behind on the sales cycle
Orders	4	Waiting for validation
Vehicles	26	To be ordered from the factory
Order	1	To be cancelled
Orders	43	To be prepared for delivery
Orders	5	To be declared delivered
Price updates	389	Awaiting validation
Vehicles	33	To be processed in the lock area
	26	
	20	
	11	

This information will be available both for UVs sold to car professionals and to private customers.

Example with a UV intended for professionals:

The screenshot shows a form for vehicle information. The 'Price of the vehicle' section is highlighted with a blue border and contains the following data:

Market value	20 310,00 € Incl. VAT
Adjusted market value <small>Powered by Autovista</small>	21 650,00 € Incl. VAT
Adjusted market value difference	- %
Professional sell price *	15479,75 € Incl. VAT

Below this section, the following values are listed:

- Actual commercial margin: 0,00 € Incl. VAT
- Entry price: - € Incl. VAT

The background shows a list of vehicles including Citroën C4 Picasso, Volkswagen Golf, and BMW X3.

Example with a UV intended for individuals:

In both cases, by clicking on the "**Automatic calculation**" button, the market value, the adjusted market value, the gap with the adjusted market value and the real sales margin will be calculated.

The screenshot shows a web interface for vehicle valuation. A central panel contains input fields for 'Location reference', 'Keys location' (with a dropdown), 'Actual mileage (km)\*', 'Guaranteed mileage' (with a dropdown set to 'Yes'), and 'CO2 emission \*' (with a unit of 'g/km'). Below these is a note '(101 g/km data from the database)' and a 'Warranty name \*' dropdown. A table titled 'Price of the vehicle' displays the following data:

Market value	20 260,00 € Incl. VAT
Adjusted market value <small>Powered by Autovista</small>	19 100,00 € Incl. VAT
Adjusted market value difference	-5.81 %
Selling price * <small>17990</small>	€ Incl. VAT
Actual commercial margin	14 991,67 € Incl. VAT
Entry price	0,00 € Incl. VAT

A blue arrow points to the 'Automatic calculation' button located below the 'Selling price' field. The background interface shows a search filter for 'UC for private indiv' and a vehicle listing for 'bee2link PP Marie V.' with a price of '17 990,00 € Incl. VAT' and a monthly cost of '325,53 € / month'.

## 2 Display of phone numbers (S&Y DEU):

In the past, mobile phone numbers were the only telephone contacts to appear on Spoticar sheets entitled "Fahrzeug-Expose".

From now on, if a landline phone number is entered on the user's profile, it will count on this paper when the mobile phone misses.

Erstzulassung	06.06.2019

#### 4 New feature: managing stocks located in several entities:

Prerequisite: have a user account in the various entities of a group.

Now fleet managers will be able to make changes to stocks of vehicles which are located in the various entities of a group without needing to log in again.

The kinds of changes and actions that a user will be able to carry out will depend on the rights that they have on the entity where the vehicle they are processing is located.

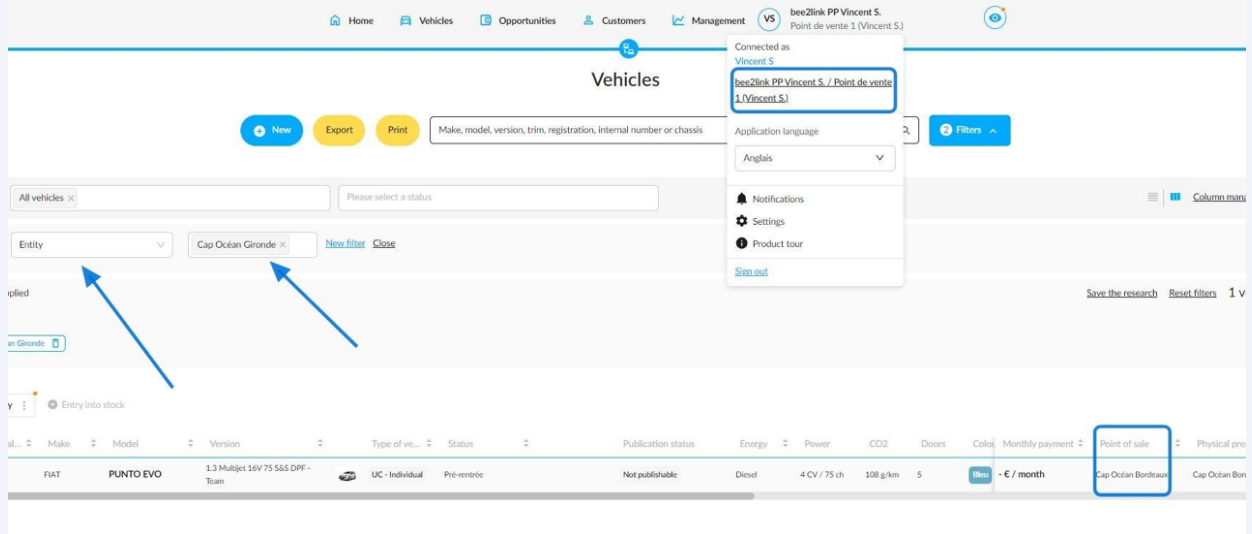

Example: right to manage prices active on the "Cap océan" entity.

The screenshot displays the 'Vehicles' configuration page. At the top, there is a navigation bar with icons for Home, Vehicles, Leads, Opportunities, Customers, and a user profile for 'Cap Océan Gironde' and 'Cap Océan Bordeaux'. The main content area is titled 'Vehicles' and includes a lightbulb icon with the text: 'The rights granted will apply to all users in the group.' Below this, there are tabs for 'NC', 'DC', and 'UC', with 'UC' selected. The 'Main permissions' section contains a checkbox labeled 'Allow access to UV' which is checked. The 'I am allowed to' section includes a lightbulb icon and text: 'Users will be able to change the status of vehicles if they have the rights to change the fields required to change the status. For example, in order to change the vehicle from a non-publishable status to a publishable status, the user must have the right to change the price of the vehicle. If he does not have this right, the change of status will not be proposed.' Below this, there are two columns of permissions: 'Creating and deleting vehicles' (checked) and 'Edit vehicle configuration' (unchecked). A lightbulb icon indicates: 'By activating the VIN search, you will make it easier to create and requalify DV and UV vehicles. Please note that you will be billed for each use of this service.' At the bottom, there is a checkbox for 'Enable VIN search for vehicles' which is unchecked, and a checkbox for 'Manage prices' which is checked. A blue arrow points to the 'Manage prices' checkbox. Other visible elements include 'SYNTHESIS', 'Administrateur', '3 Users', 'Director', 'Manage group p...', 'Opportunities', 'The opportunities modu...', 'actions that lead to the s...', 'This service now include...', 'Lead'spot and Carsell, th...', 'management of an oppo...', 'Active', 'Users within the', 'Administrateur A', 'e. surname', 'Q', and 'ee2link.fr'.

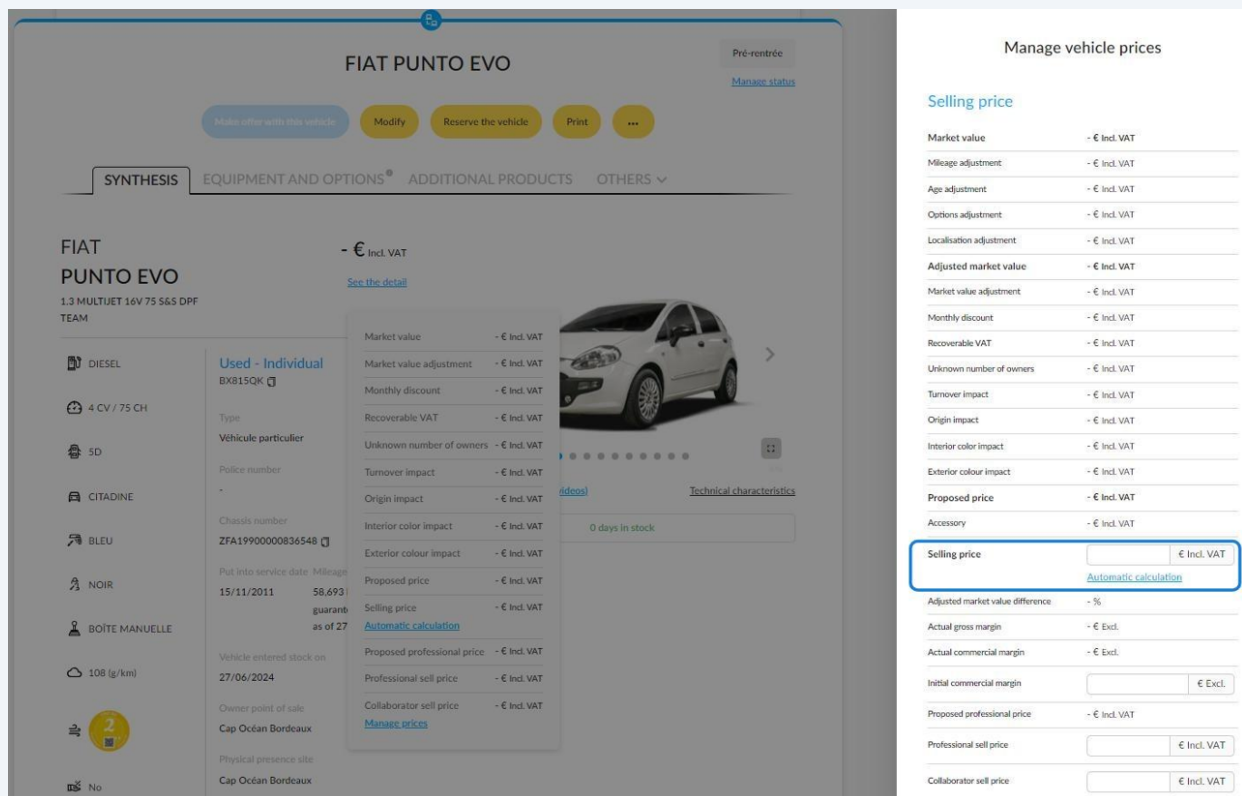

Management of prices is not active on the "Bee2link PP Vincent S" entity.

The screenshot shows the 'Vehicles' permission configuration window. At the top, there are navigation tabs: Home, Vehicles, Opportunities, Customers, and Management. The current entity is 'bee2link PP Vincent S. Point de vente 1 (Vincent S.)'. The window title is 'Vehicles'. A note states: 'The rights granted will apply to all users in the group.' Below this are tabs for 'NC', 'DC', and 'UC', with 'UC' selected. The 'Main permissions' section includes a checked checkbox for 'Allow access to UV'. The 'I am allowed to' section contains a note: 'Users will be able to change the status of vehicles if they have the rights to change the fields required to change the status. For example, in order to change the vehicle from a non-publishable status to a publishable status, the user must have the right to change the price of the vehicle. If he does not have this right, the change of status will not be proposed.' There are four permission categories, each with a checkbox and a description: 'Creating and deleting vehicles' (unchecked), 'Edit vehicle configuration' (checked), 'Manage prices' (unchecked, with a blue arrow pointing to it), and 'View prices' (checked). The background shows a sidebar with 'Administrateur' and '2 Users'.

Selecting a vehicle located on a point of sale which belongs to the "Cap océan Gironde" entity while being logged in on the "Bee2link PP Vincent S" entity.

The management of the vehicle's selling price is available:

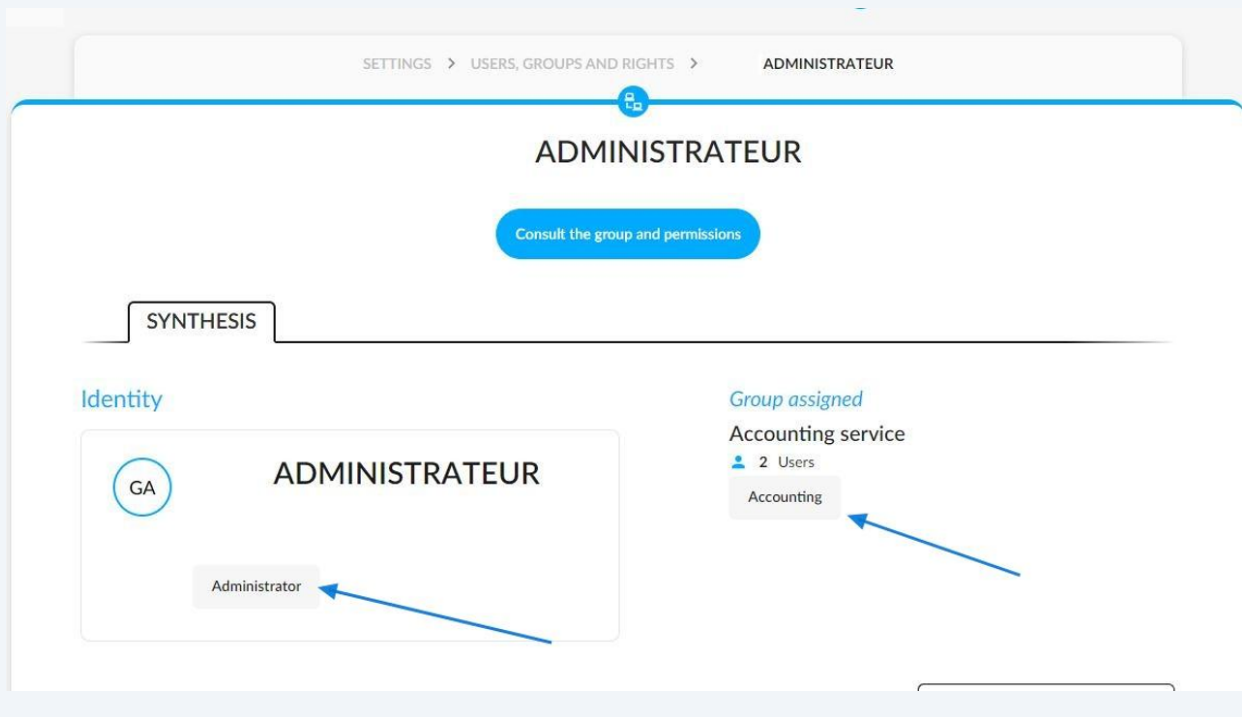

# Settings

## 1 Addition of an extraction system to record actions carried out with our paid features:

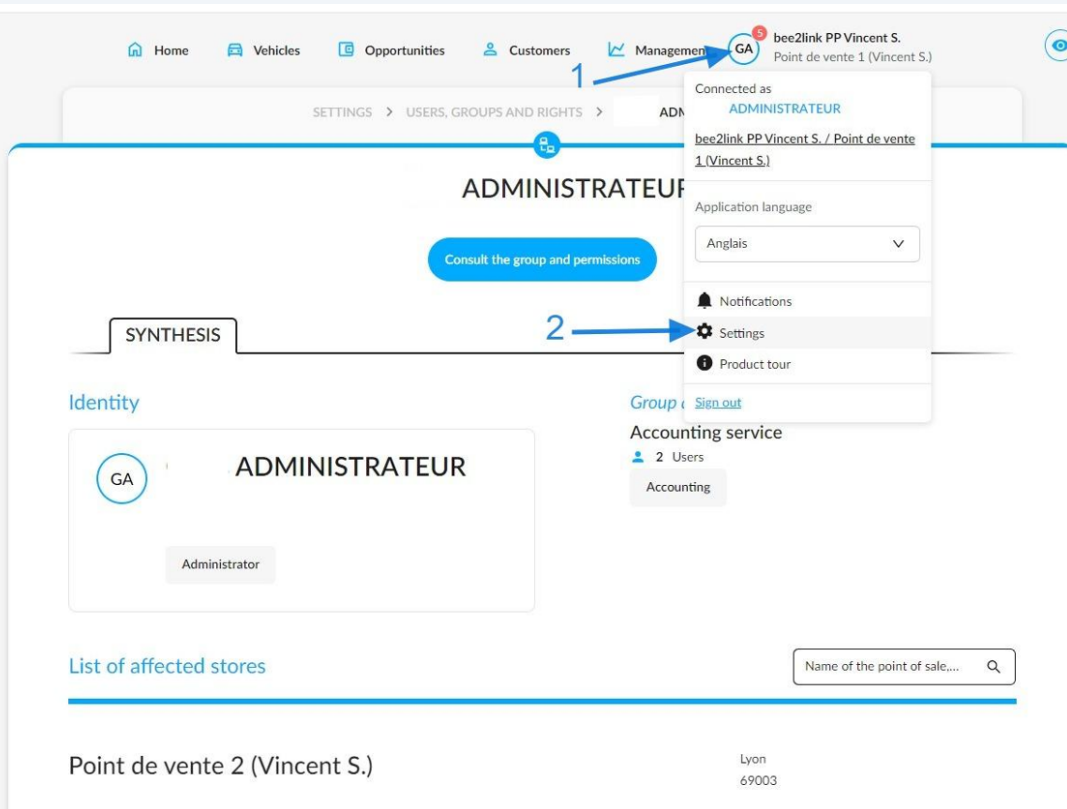

The "Accounting management" menu now allows you to extract data to monitor the number of actions carried out by your employees with our paying features: Search by V.I.N, Future trade-in value, e-Signatures.

### Prerequisites:

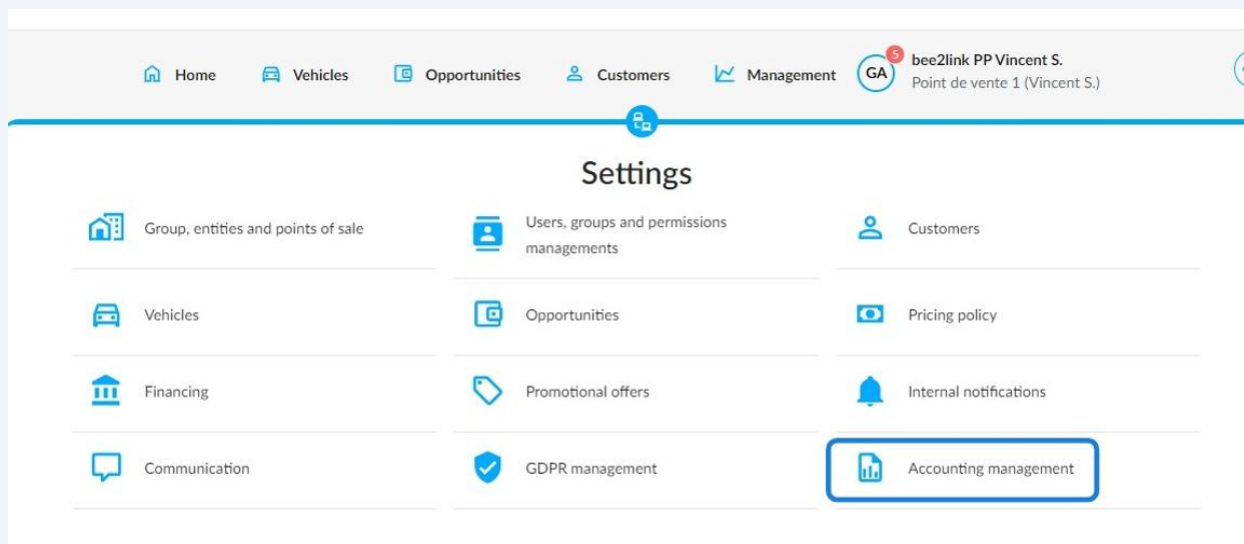

To retrieve this data, you need to have an account with "**administrator rights**" which belongs to the "**Accounting**" type group.

Once you have set up the account, you can click on your initials to have access to the **"Settings"** menu.

Then, click on **"Accounting management"** to extract the data of your choice:

It will be possible to download an Excel file showing the number of VIN searches carried out in the previous month.
