## Home

### 1) Displaying the entity and point of sale on the home page:

To optimise the display of the entity and point of sale to which users are connected, the name of the entity and point of sale have been added to the top right-hand corner of the home page, close to the users' initials.

The screenshot displays the OpenFlex Home dashboard. At the top, there is a navigation bar with links for Home, Vehicles, Opportunities, Customers, and Management. The user profile section in the top right corner shows the initials 'AA' and the text 'bee2link Vincent S. EN' and 'Point de vente 1 (Vincent S. EN)'. Below the navigation bar is a large banner image of a red car. On the left side, there is a 'My shortcuts' section with three cards: '1371 Test Opportunités ...', '0 VO entités', and a '+ New shortcut' button. Below this is a grid of six data cards: '145 Estimates Awaiting validation', '7 Vehicles Behind on the sales cycle', '0 Vehicles To be ordered factory', '3 Orders To be prepared for delivery', '0 Orders To be declared delivered', and '74 Price updates Awaiting validation'. On the right side, there is a 'Diary' widget with a 'New event' button and the text 'No events scheduled this week.' and 'No events scheduled during next weeks.'.

# Vehicles

## 1) Modification of the delivery with trade-in declaration process:

Following feedback from our customers, the process for declaring a delivery involving a trade-in has been modified.

It has become necessary to answer "Yes" or "No" to the question "Has the trade-in been carried out ?", and to enter the mileage of the trade-in vehicle in order to be able to declare the delivery of the customer's new vehicle.

### Report

Fill in the appointment report \*

Declare deliveryCancel

## 2) Optimising after-sales service information display:

Prior to this update, after-sales interventions were not visible at group level. It was necessary to connect to each entity where an intervention had taken place in order to view the data in the "After-Sales Service History".

To facilitate the transmission of this information, we have made visible in the after-sales vehicle history all the work carried out in the various entities belonging to the same group.

The screenshot displays a user interface for 'AFTER-SALES SERVICE HISTORY'. At the top, there are navigation buttons: 'Make offer with this vehicle', 'Modify', 'Reserve the vehicle', 'Print', and a menu icon. Below these are tabs for 'EQUIPMENTS AND OPTIONS', 'ADDITIONAL PRODUCTS', and 'AFTER-SALES SERVICE HISTORY'. A search bar for 'Invoice number, action pe...' is located on the right. The main content is an 'Invoice list' with three entries, each showing an invoice number, a description of the work done, the date, and the amount in Euros (€).

Invoice Number	Description	Date	Total Amount (€)
N° 1/202404/100994	Test interface 4 (Everlog) done at 25,000 km	24 avr. 2024	72,84 € Incl. VAT
N° 14/202404/100657	Test interface 4 (Everlog) done at 25,000 km	24 avr. 2024	18,85 € Incl. VAT
N° 1/202404/100995	Test interface 4 (Everlog) done at 25,000 km	24 avr. 2024	126,06 € Incl. VAT

### 3) Choosing and sorting equipment for price display and for publication

**Prerequisites:** have the right to manage publications.

*Settings/Users, groups and permissions/Vehicles/Manage publications*

it, as well as access to the published advertisements. The automatic calculation will still be available to users who do not have this right.

**Managing stock depreciation**

Users will be able to modify the provision held on vehicles and access depreciation reports within the control system.

**Manage publications**

Users will have access to visual edition of publications informations (comments, advertisers on which ads are published, published equipments) of the vehicle.

**Access attached documents**

Users will be able to add and delete attached documents on vehicles. A user without this permission will not be able to access attached documents.

**Edit vehicle managements informations**

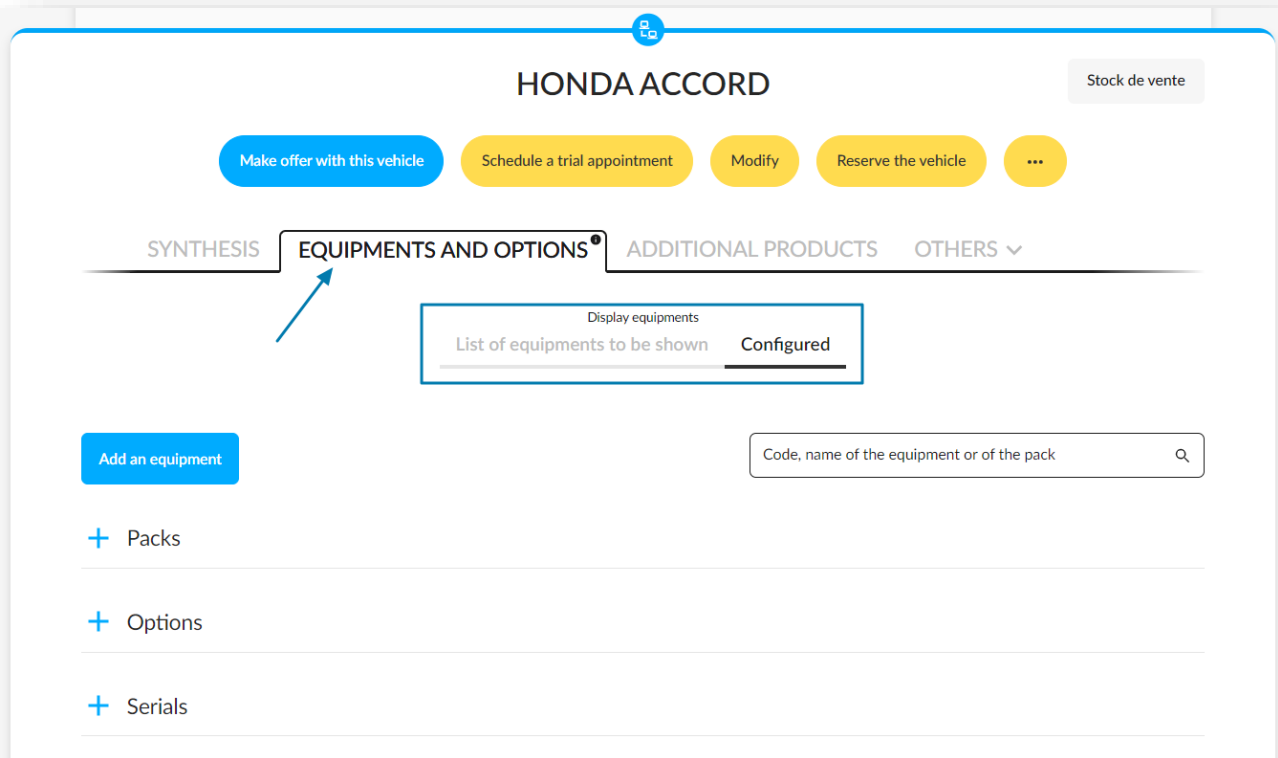

Users will be able to edit vehicle records. If you activate this permission, you will be able to restrict the editable fields if necessary.

I want to limit the modification of vehicle management fields

Save

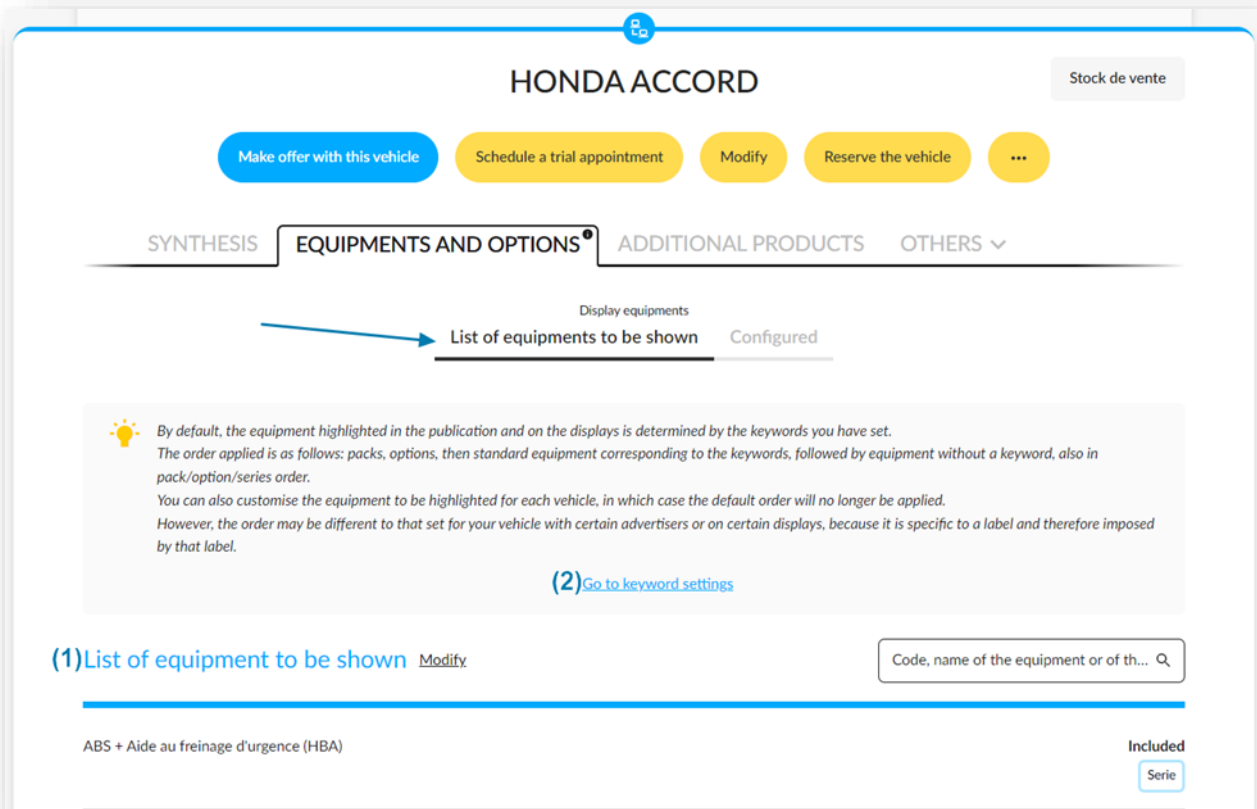

Cancel

A new setting is available on the NC/DC/UC sheets in the « Equipment and options » tab in order to optimise the emphasis of the packs, options and serials which will be edited on generic displays and published on advertisements:

The list of equipment of vehicles will display all categories of equipment in the following order by default: « Pack, Options, Serials » (1),

Reminder: a setting already enables you to select automatically the equipment that you wish to show. A shortcut that leads to it has been added to enable a quick adjustment (2).

Serials which have in their designation one of the key words entered at this stage will appear on top of serials list.

### Keywords for equipment to highlight [Modify keywords](#)

Keywords can be used to automatically select the equipment to be highlighted in the publication and on the flyers (priority will be given to packs, options and then standard equipment corresponding to the keywords).

GPS;LED;NAVI;AUTO;

It is possible to select one by one the packs, options and serials that you wish to edit and publish by clicking on the « Modify » button.

Display equipments

List of equipments to be shown

Configured

By default, the equipment highlighted in the publication and on the displays is determined by the keywords you have set.

The order applied is as follows: packs, options, then standard equipment corresponding to the keywords, followed by equipment without a keyword, also in pack/option/series order.

You can also customise the equipment to be highlighted for each vehicle, in which case the default order will no longer be applied.

However, the order may be different to that set for your vehicle with certain advertisers or on certain displays, because it is specific to a label and therefore imposed by that label.

You can find out whether a vehicle publication has been successful or whether an error occurred by adding the « Publication status » column in the table showing the vehicles stock.

You can filter the displayed results by selecting the appropriate publication statuses:

The screenshot shows a web interface for managing a vehicle stock. At the top, there's a search bar with a 'Filter' button and a 'New' button. Below the search bar, there are filter options for 'Publication status', 'Publication error', and 'Published at'. The main table displays vehicle information with columns for Internal number, Make, Model, Version, Type of vehicle, Status, Energy, Power, CO2, Doors, Colour, VIN, Point of sale, and Physical. A callout box highlights the 'Publication status' column, showing options for 'Published at' and 'Publication error'.

# Customers

## 1) New field on customer records:

A new field for entering the different types of driving licences held by customers has been added to the 'Additional information' section of the 'Driving' section of customer files. So, at group level, if you are a car/motorcycle distributor, you will be able to offer them deals on vehicles that match the licences your customers hold.

# Settings

## 1) New permission to confirm order cancellation:

A new permission to confirm the cancellation of orders is now available. This right can be configured by user group in the "Opportunities" settings:

### Opportunities

 The rights granted will apply to all users in the group.

#### Main permissions

No validation right (by default).

Right to validate trade in offers

Right to validate own trade in offers

#### I am allowed to

Validate orders  
Users will be able to consult orders as well as the elements of the customer file in order to validate them

Manage and view trade-in prices  
Users will be able to access price details as well as published advertisements. They will also be able to change the price and destination of the vehicle.

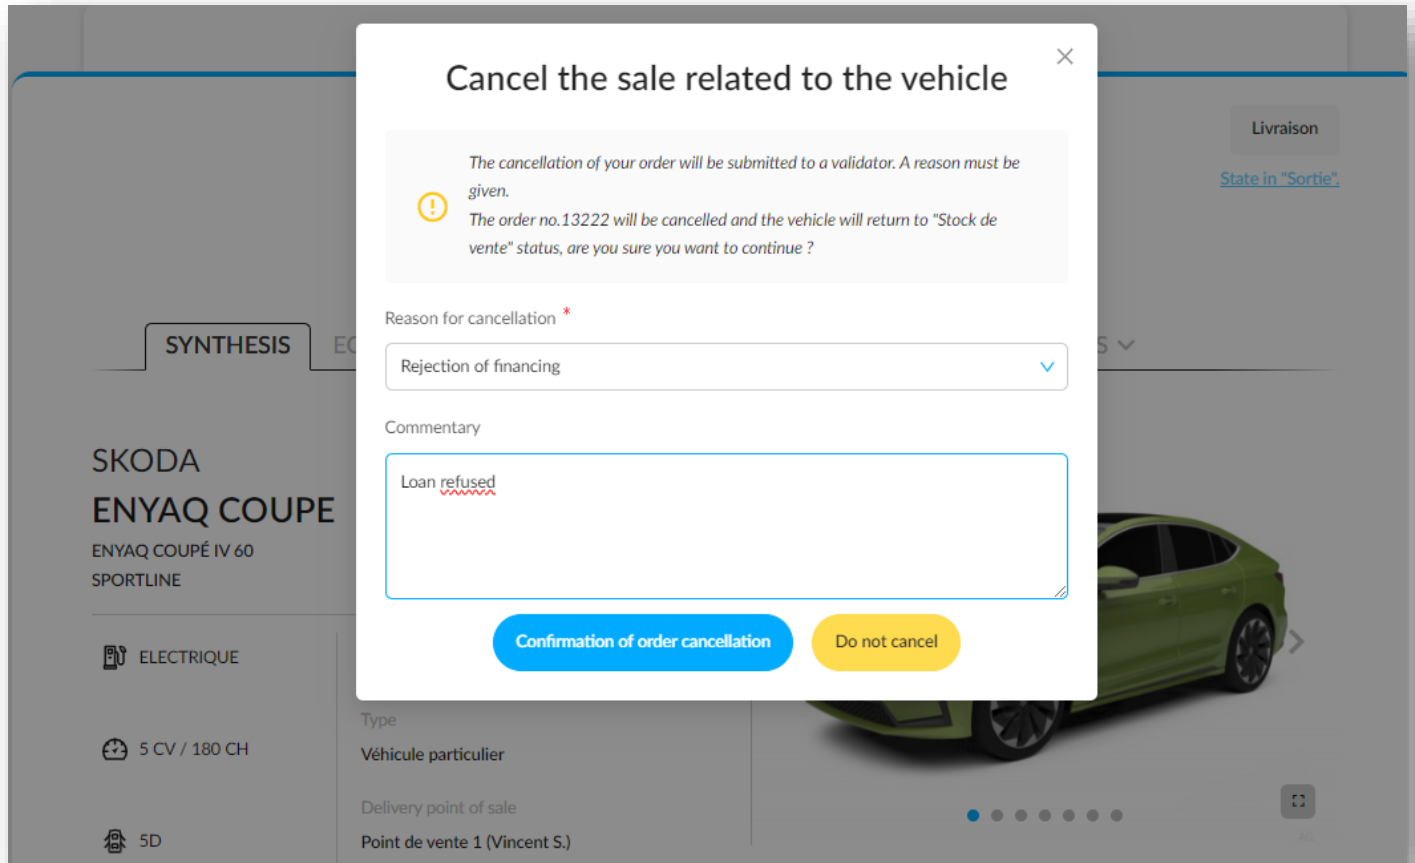

Give up the orders  
Users will be able to give up orders. Without it only the modification of an order is possible. Please note that if the user is a member of a "Seller" group, then he will only be able to cancel his own orders.

Confirming order cancellations  
Users will be able to view and confirm order cancellation requests. By activating this right, orders can no longer be cancelled without confirmation from a person with this right.

Users who have this permission will be contacted by salespeople who wish to cancel an order.

Example with a member of the "salesperson" group who only has the right to cancel orders:

When the "Cancel order" button is clicked, a window will open so that the seller can specify the reason for the cancellation, with additional explanations in the "Comments" box:

The cancellation request will be put on hold while the person in charge of confirming cancellations processes the request.
