Vehicles

1. Real-time auction updates:

For more dynamism, the distributor and the merchants who take part in an auction will view the higher bids of each person involved in real time.

It will be no longer useful to refresh PriceBack accounts manually in order to follow the auction proceedings.

Example: 2 merchants are bidding for an auction on a lot. The first one has offered €70,100 at the beginning of the auction.

The second merchant is warned about the higher bids made by their competitor in real time with successive notifications. They can view the last amount bid.

The screenshot shows an 'Auctions' page with a notification in the top right corner: 'Stock auction n°51-706 You are losing the auction New offer at the price of 36 600,00 €'. The main content area displays two vehicles for sale:

- LANCIA Musa 1.3 Multijet 16v 95 ch DPF Stop&Start Gold DFS** (AA007AA - 52,000 km - 5/5/2011) with a last offer of 36 500,00 €.
- AUDI Q7 3.0 V6 TDI 245 DPF Quattro Ambition Luxe Tiptronic A 7 pl** (GH458TR - 23,000 km - 5/12/2012) with a starting price of 36 300,00 €.

Buttons for 'I bid' and 'Refuse' are visible for the second vehicle. The interface also includes a search bar, a 'Display' dropdown set to 'All auctions', and a dealer information section for 'Point de vente Anglais'.

As for the distributor, they will see the sales margin generated by successive bids updated automatically until the end of the auction.

The screenshot shows the 'Auction room #496' interface. It includes a 'SYNTHESIS' tab and a 'Broadcast' section indicating the auction is distributed to all automotive professionals. Key details include:

Opportunities

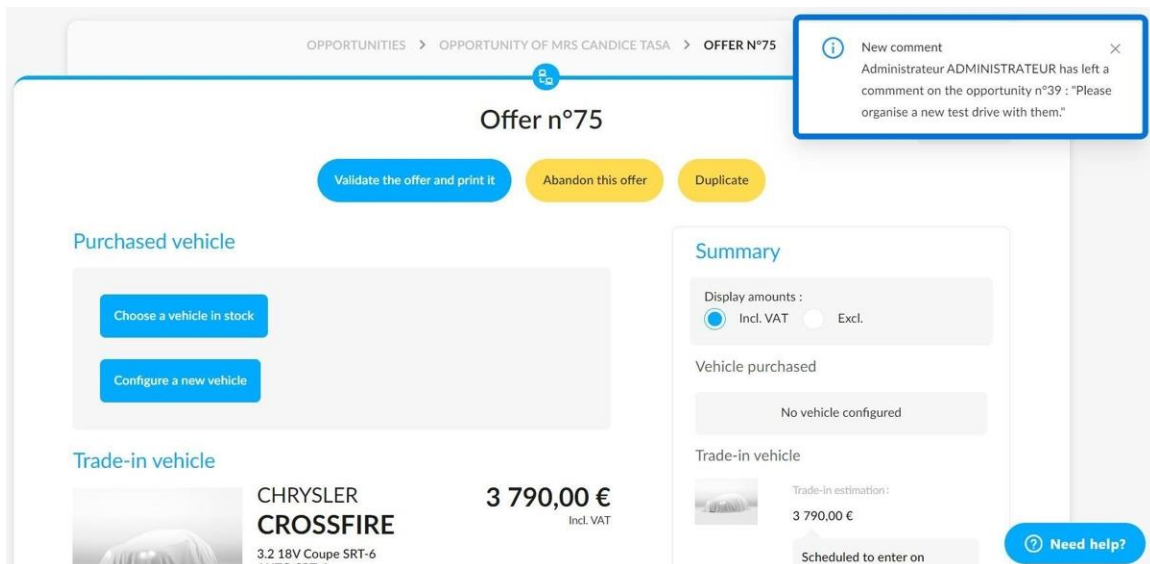

1. New notification:

From now on, salespeople will be warned with a notification when a manager adds a comment on an opportunity which they are monitoring.

Example: as a Sales Manager, I add a comment for the salesperson responsible for monitoring the following opportunity:

The latter receives straight away a notification which includes the entirety of the message which is addressed to them. By clicking on the notification, they will be redirected to the opportunity in question.

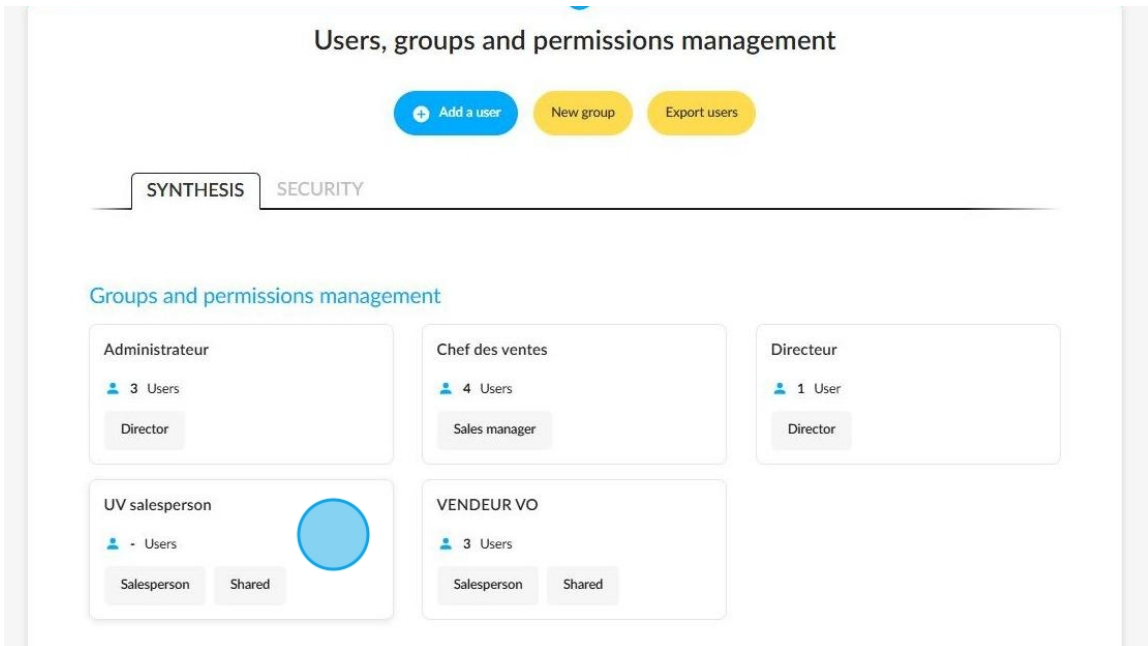

Settings

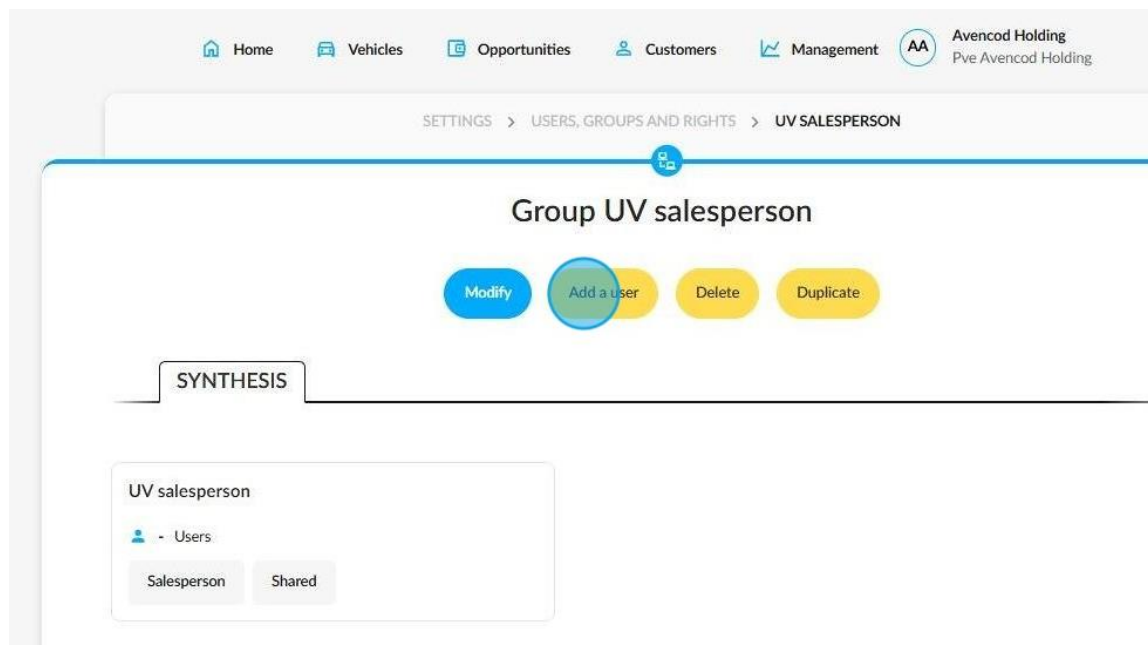

1. Adding a user to a shared group from a holding:

As a platform administrator in a holding, you now have the possibility to assign a user to all the entities in your group.

To do that, select one of the **Shared** user groups in the settings of users, groups and permissions management.

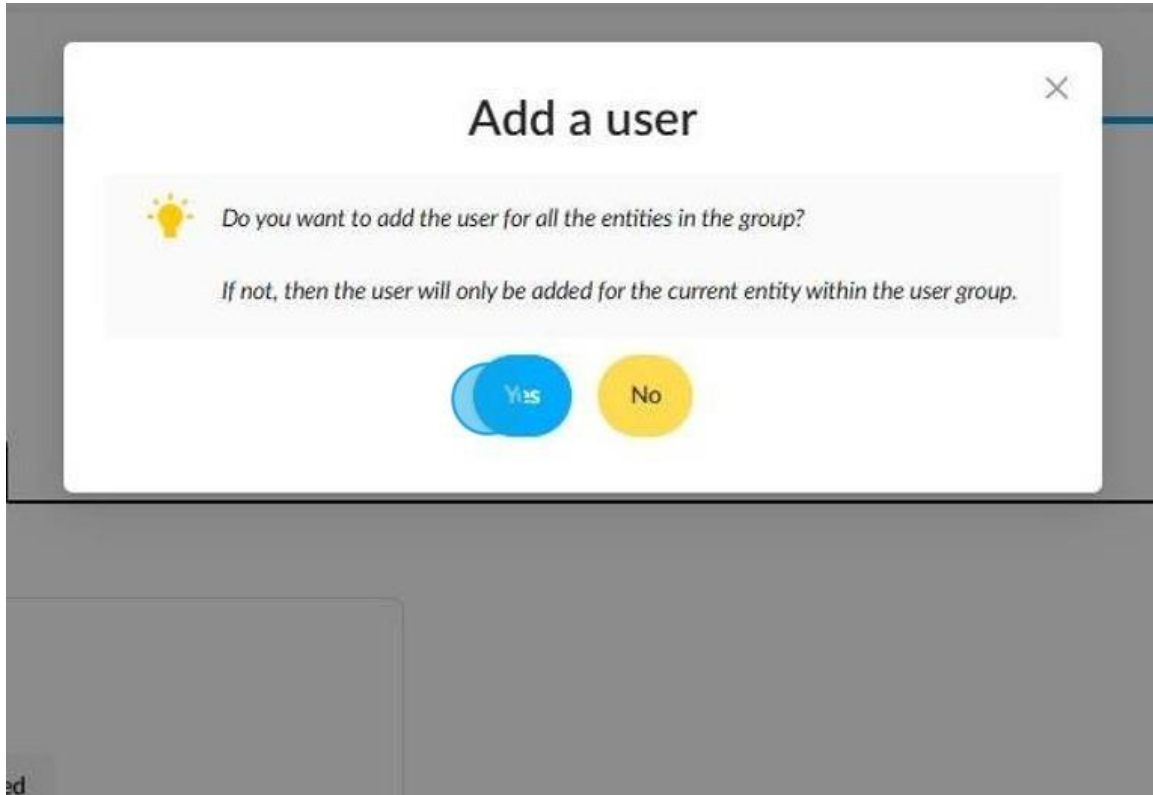

Once you have selected a user group which is shared between all the entities in the group, click on the **"Add a user"** button.

Then, a pop-up window will be displayed to ask you if you wish to add this user to all the entities in the group.

By clicking on **"Yes"**, you will confirm the addition of the account for all the entities in the group.

If you click on **"No"**, the user will be added only to the entity where you are logged in.

Consultation of a user account added to all the entities of the group. If you move your cursor over the **'Entities'** and **'Sales points'** labels, the details of the assignments will be displayed.

Manage group permissions

Opportunities The opportunities module groups together all the actions that lead to the sale of a vehicle. This service now includes insta'price, scan'price, Lead'spot and Carsell, thus facilitating the global management of an opportunity. Active	Customers Create, modify, delete, reassign a customer master record. So many rights to discover in this module, also called Data'bank. Active	Vehicles Manage visibility on the management, logistics and publication of your NV, UV and DV stock. This is the revised and optimised Carshop module. Active
