

FAQ-103-SETTINGS-How do you set the number of photos to be taken during a trade-in?

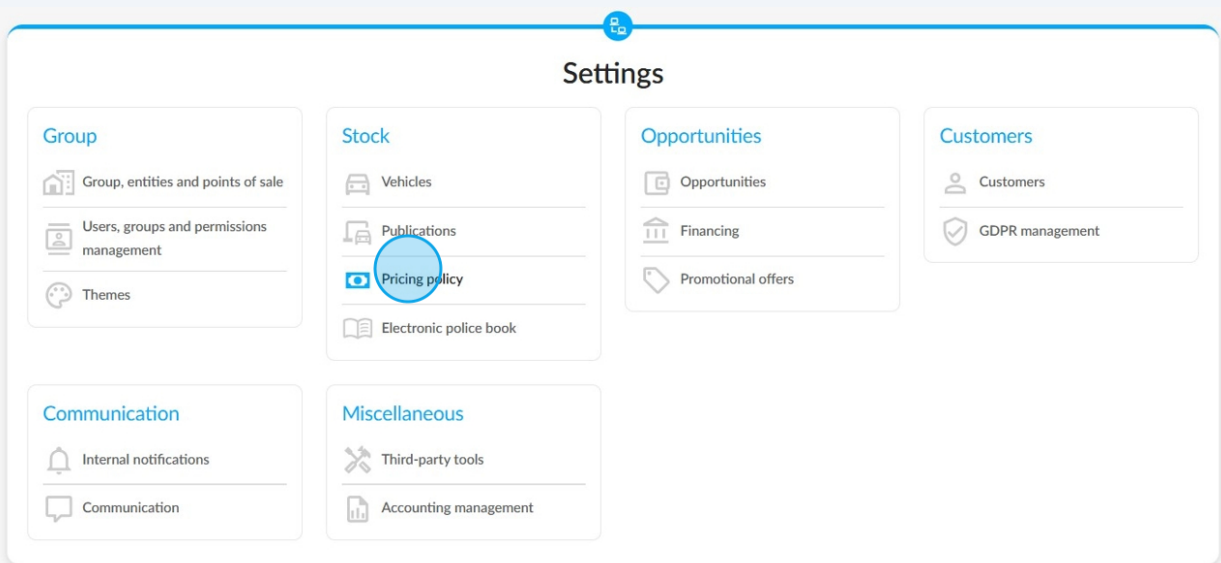

1 Prerequisite:

Have **administrator** rights on OpenFlex.

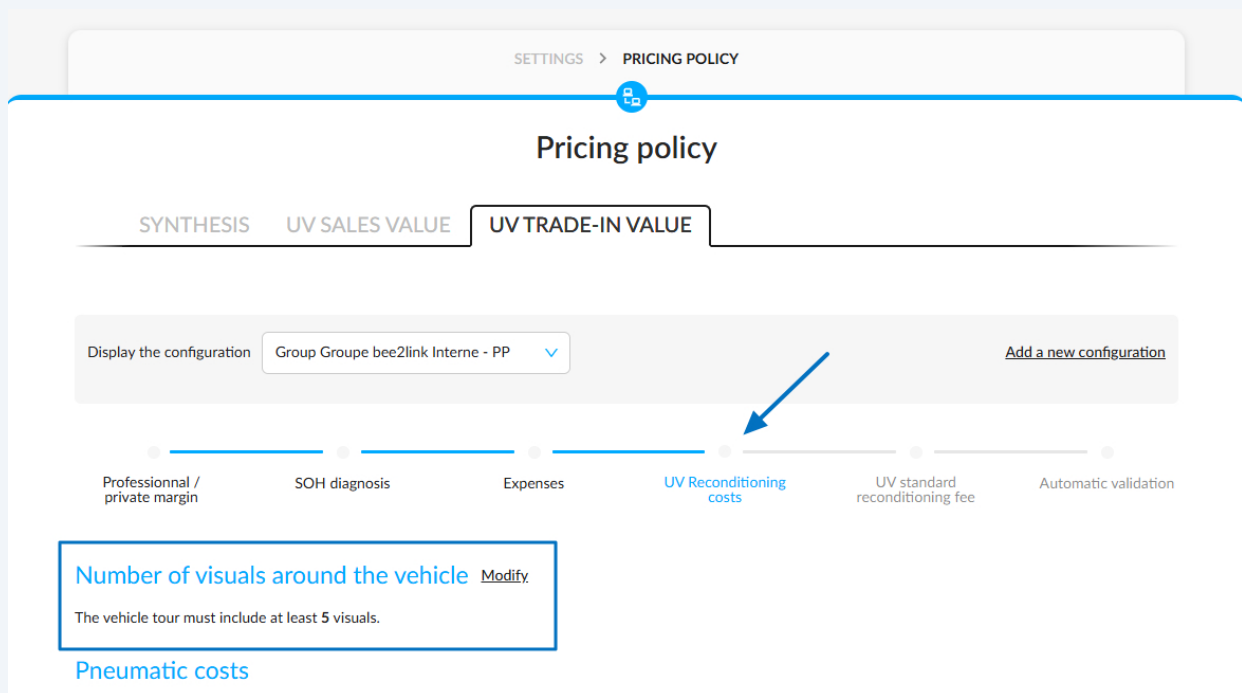

2 From the OpenFlex home page, click on your **initials** to access the platform **settings**.

The screenshot displays the OpenFlex home page interface. At the top, there is a navigation bar with tabs for Home, Vehicles, Leads, Opportunities, Customers, and Management. The user's profile is shown as 'bee2link PP Vincent S.' with initials 'AA' and a notification badge. A dropdown menu is open, showing the user is connected as 'Administrateur ADMINISTRATEUR' and listing options for Application language (set to 'Anglais'), Notifications, Settings (highlighted with a red box), and Help centre. Below the navigation bar, the main content area features a large image of a car, 'My shortcuts' (with 205 BLA, 2777 Couleur, and 52 Mes opportunités...), and 'Priority tasks' (with 55 Voiture entité Rom...). A 'Print alerts' button is visible at the bottom left.

3 Next, select the **pricing policy** parameters in the "**Stock**" section.

4 After going to "**UV reconditioning costs**", click on the "**UV Trade-in value**" tab to change the number of visuals to be entered during the vehicle tour.

5

Enter the number of visuals to be respected and press the **'Validate'** button to save your changes.

Professional / private margin SOH diagnosis Expenses **UV Reconditioning costs** UV standard reconditioning fee Automatic validation

Number of visuals around the vehicle

 Leave blank if you do not wish to set a minimum.

The vehicle tour must include at least visuals.

6

This means that during a trade-in process, your subordinates will need to add enough photos to comply with the settings you have configured. Otherwise, they will not be able to finalise the trade-in.

The number of missing photos will be indicated.

Setting the maintenance costs

Are there any maintenance costs to be expected *

Yes ▾

Vehicle intended for scrapping *

No ▾

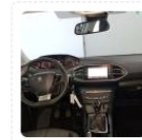

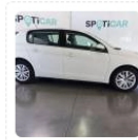

Add visuals of the turn of the vehicle

Please add all the required visuals to complete your estimate.
Remaining 1 visual to deposit.

Add a visual
Max. size: 20Mo
